LEARNING SUPPORT -LITERACY UPDATE

Our Learning Support Team conduct whole school beginning and end of year testing of reading components so that all teachers have that information to be able to support and progress all students in their learning.

We run MultiLit Intervention Programs which commence in the second half of first term and carry on through Term Two and Three. Term Four, after whole school testing allows for additional time for students needing additional time and support after completing the intervention program. These intervention programs run for 20-30 weeks and fit within the organisational framework of gathering data through whole school assessments in order to provide targeted intervention and instruction.

2022 was a very challenging year for us because of restrictions to grouping students for intervention and then maintaining staffing. As a staffing priority, every class needs a teacher and this at times impacted on the role of our learning support staff. We now have additional staff trained and have extended learning support to Pre-Primary to get in early for our children. We are striving to ensure that 2023 is a better year for this most important intervention for students.
